Designed to be decorative, functional, and durable

Selux banner arms are designed to provide a decorative and functional feature used to create brand awareness or generate excitement ahead of an upcoming event. Use banner arms when you are trying to get your message to stand out on a busy street, path, or square. Banner arms meet the demands of harsh weather, wind, and UV rays, and are highly effective when you are looking for an opportunity to get your business name, logo, or message relayed to pedestrians or street traffic.

**Form and Installation**

The Selux aluminum banner arm can be made as part of the pole (custom) or simply installed by securing the attachment around the pole or column. Consult factory for all banner arm heights and orientations. The banner attachments can be finished in Selux standard colors or any of our custom RAL finishes to fit your project needs. Selux recommends that banner arms should be at least xx feet from ground. Use as an available addition on round, tapered, and square poles, as well as columns.

## BANNER ARMS

- Mounting** Any selux exterior pole or column offers the option of a banner arm · single or double
- Construction** Various style brackets made from low copper aluminum · double-sided vinyl or other materials
- Testing** Wind tunnel tested for longer lasting banner · water-resistant · resistant to harsh UV rays
- Lead Time** Add on to any existing project with a fast turnaround time
