M36 MRC Wall Washer

For designers who need a wall wash with floor to ceiling uniformity, comfortable lighting and high efficiency, Selux offers the M36 MRC Wall Wash. This wall washer, has a recessed LED that is tucked behind the baffle creating a subtle presence in the overall design for offices, galleries, or hospitality spaces.

Product Specifications

Light Engine:	Mid-power LEDs
Output:	Up to 724lm/ft and 9.2W/ft · 79lm/W
CCT:	2700K · 3000K · 3500K · 4000K · 3-Step Binning
Color Quality:	Ra (CRI): 94 · R9: 69 · Rf: 92 · Rg: 99
Distributions:	Direct asymmetric wall wash · direct/indirect with direct asymmetric wall wash and indirect lambertian and asymmetric options
Optics:	Direct: Wall wash optic Indirect: White lens · microprism · symmetric · Asymmetric 20° wall washer · asymmetric 20° wall grazer, · wide batwing · light up lens
Options:	Occupancy/ photocell sensor options · integral emergency option · unlit outside corner · in-line fuse · separate switching · remote micro inverter
Project-Specific Modifications:	Custom lengths and non-standard corners

A soft and even distribution

MRC Micro Reflector Cell Technology allows for exceptional optical control. The M36 MRC Wall Washer is a discrete, exceedingly low glare fixture with very narrow lateral throw which allows for precise light placement. A soft and even distribution illuminates the top of the wall to the floor, providing an excellent uniformity ratio.

In combination with a high CRI value, the
**M36 MRC Wall Washer offers a high
fidelity and high gamut index**

In combination with a high CRI value, the M36 MRC Wall Washer offers a high fidelity index (Rf) and high gamut index (Rg). The CRI and TM-30 values for the M36 MRC Wall Washer at 3000K are shown below. When creating a lighting design, attention should be paid to the Color Vector Graphic. A perfectly overlapping Color Vector Graphic

indicates a light that perfectly matches the reference light (the sun).

The M36 MRC Wall Washer offers high quality light in standard or custom outputs up to 724lm/ft.

M36 MRC Wall Washer

Use the M36 MRC Wall Washer in combination with the rest of the M36 product offering to match the same form factor and to create a cohesive and seamless design across your project.

Wall washing and vertical uniformity

The M36 MRC Wall Washer is able to achieve excellent light distribution down an entire wall, floor to ceiling, with no glare to the viewer. The M36 MRC Wall Washer has excellent lateral throw for overall better uniformity ratios. Blank covers are used in corners to ensure even illumination on the wall, avoiding undesirable hot spots in the corner.

For best results, it is recommended to maintain a 24" - 30" setback distance from the surface that is being illuminated and maintain an 8" setback distance from the side wall.

Outside unlit corners

bring new style to architectural lighting

The M36 MRC Wall Washer with outside corners and blank faceplates brings a new style to architectural lighting. These unique features allow for design flexibility and a project specific approach. To avoid any glare that could occur when the luminaire turns the corner, it was determined that the 3ft blank cover provided visual comfort without disrupting the effect on the wall.

Selux also offers a variety of custom configurations for your project needs. Combine your idea with the superior optical performance, the high color rendering, and various mounting options, the M36 MRC Wall Washer is perfect for a multitude of project types. It's that simple!

Optical Systems for various lighting tasks

The M36 series consists of two independent product lines - M36 and M36 MRC Wall Washer. Providing the same form factor is beneficial, ensuring the design layout can be used all through the project with two versatile products, an ideal lighting solution for your interior lighting schemes.

Whether for exhibition lighting in galleries and museums or for shelf lighting in sales rooms, M36 MRC Wall Washers are recommended wherever there are high requirements for homogeneous, vertical lighting. Minimal distances can be obtained between wall and luminaire.

When a fixture is needed to extend wall to wall

Some lighting applications require a fixture to extend wall to wall. This can be achieved by using a blank faceplate as a filler at the ends of a fixture. Using blank faceplates in this manner can continue the appearance of a luminaire.

The lit section of the M36 MRC Wall Washer is centered along the length of the fixture and two blank faceplates are

cut to size and inserted at either end of the fixture making for a clean and aesthetically pleasing solution.

For project specific lengths or configurations, please consult factory. See specification sheet for more details.

The nominal 6" optical cassette provides flexibility for almost any wall to wall configuration.

Small form factor that packs a punch

Don't let the small size of the M36 MRC Wall Washer fool you. It provides superior optical performance, creating even illumination with just the right amount of visual interest.

With a variety of options, this luminaire is customizable to your project needs!

Sensor Options (consult factory)

- Enlightened
- Sensor Switch
- nLight Enabled
- Lutron Vive
- Other sensor integration upon request

Configuration Options

- Unlit Horizontal 90° Outside Corner
- Unlit Horizontal 90° Inside Corner (consult factory)
- Custom Lengths

Emergency Options

- Emergency Circuit Wiring
- Remote Micro Inverter
- Integral EM Battery Pack

Declare. 

M36 MRC WallWasher

Declare label for our
Interior luminaire

Declare is a platform to share and find healthy building products. Manufacturers willingly disclose product information that can be found on the Declare labels. These labels are then accessible on a free and searchable database used by prominent designers, real estate owners and home owners, to specify products they know they can trust and that meet the requirements of leading green building standards, including Core Green Building, LBC, LEED, and WELL Certification.

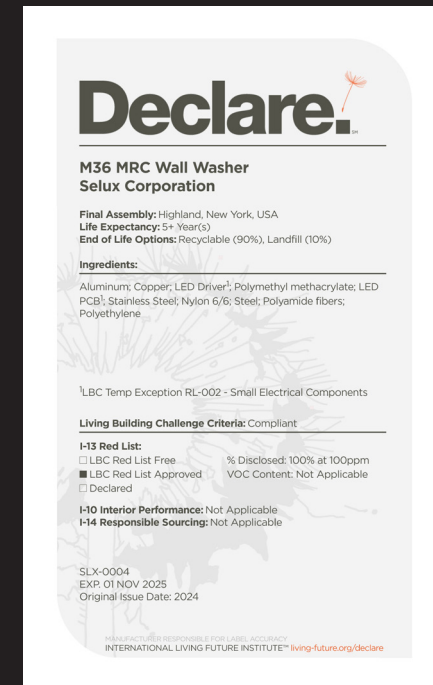

Declare has positively changed the materials marketplace to enable the creation of buildings that support human and environmental health and has made it extremely easy to facilitate and simplify the exchange of information.

Selux is also proud to be Living Future Corporate Member. With this credential, Selux is recognized for its proficiency in the world's more ambitious, advanced, and holistic sustainable design standards.

You can trust that with these credentials, Selux and M36 MRC Wallwasher, is a brand to trust.
